

In November, we shared the news of a new agreement with the Danish military on providing ship capacities for sea transport of military equipment over the next six years. As a result of this, Finlandia Seaways would join the Ark cooperation and Ark Futura leave it.

Prior to joining the Ark fleet from 1 January 2021, Finlandia Seaways needed to reflag from the Lithuanian flag to the Danish flag. This was done today, on 18 December, at a ceremony where the crew of Finlandia Seaways hoisted the Danish flag for the first time.
