

CITRIX Access VIA Workplace App

Configure external PC for DFDS Citrix

To access the DFDS Citrix environment, you need to first install a Citrix client application. The steps below will take you through the setup of the client.

Prerequisites

1. Citrix client
2. DFDS Login configured with MFA access instructions can be found [here](#).

Install Citrix client

1. Open up a browser and go to www.citrix.com/downloads
2. Select to download the current "Citrix Workspace App"
3. Run the downloaded file to install, accepting all defaults

Configure Workspace App for DFDS

1. Once the Citrix Workspace App is installed launch the application

2. When prompted enter address port.dfds.com

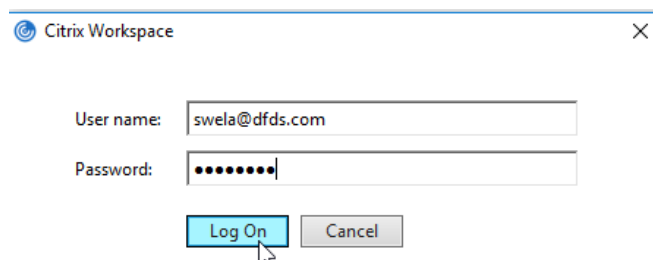

Add Account

Enter your work email or server address provided by your IT department:

3. Click on Add

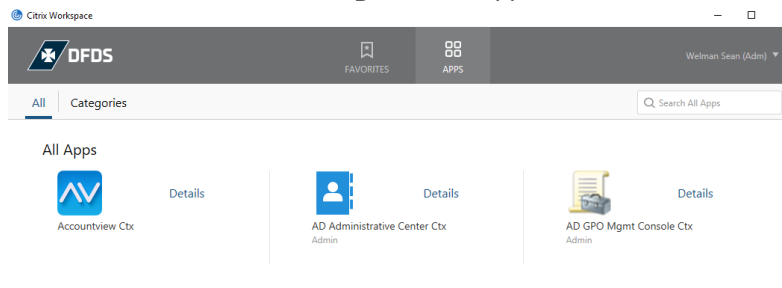

4. When prompted, enter your DFDS Credentials and click on Log On

5. Approve the logon via your configured MFA method

6. Once authenticated you may need to open the Citrix Workspace app again

7. You can now see and Launch your Citrix applications

Once configured you can access your apps by starting the Citrix Workspace App. You will then be prompted to logon and approve via MFA, and your apps will be available for use.
